

Export Packing - Cost per Vessel and Outsourcing Check

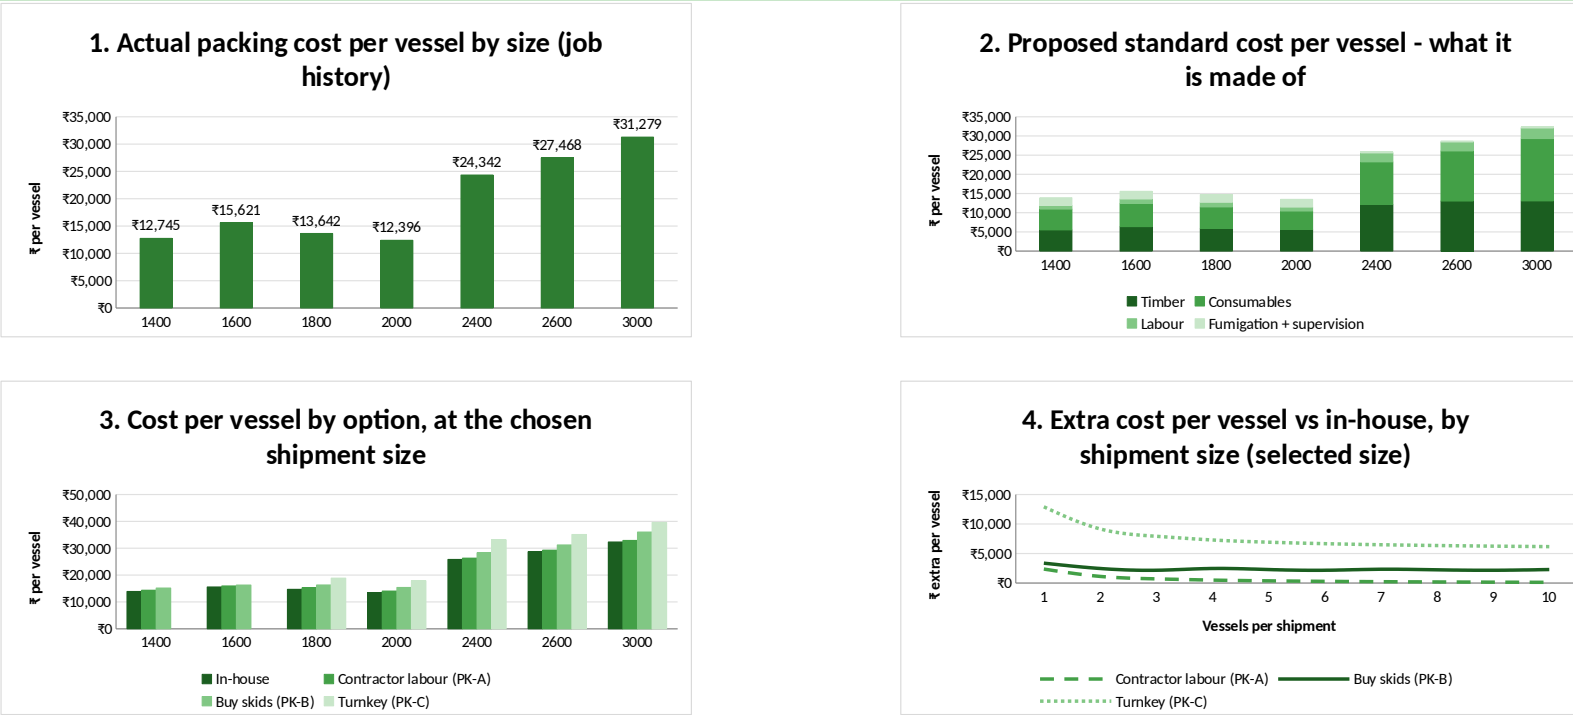

FRP pressure vessels 1.4-3.0 m | 19 export packing jobs, Oct-25 to Jul-26 | rates as of Aug-26

Case study by Kousani Das | Sep-2026 | all data simulated for illustration - no company, customer or supplier data included (see Notes)

SELECT	
Vessel size (mm)	2400
Vessels per shipment	4

KEY FINDINGS
1. Actual vs design: 2.0 m jobs used 6% more timber than the BOM. The other 6 sizes had no BOM - standards proposed from 16 jobs.
2. Flat-rack sizes (2.4 m and above) cost 2.0x a container size to pack - heavier saddles and weather cover.
3. In-house is the cheapest way to pack every size; the turnkey packer quotes about 1.2x our own cost.
4. Next step: release the proposed BOMs. Buy ready-made skids only if the packing bay becomes a bottleneck.

Vessels packed	Avg cost per vessel - container sizes	Avg cost per vessel - flat-rack sizes	Rupee move since USD price set	Cheapest for selected size
60	₹13,126	₹26,353	9.4%	In-house
19 jobs	1.4-2.0 m	2.4-3.0 m	USD-INR 87.65 to 95.89	at 4 vessels per shipment

Terms

- Flat rack: open container frame for vessels too wide for a closed container door
- 40HC: 40-ft high-cube container. Skid / saddle: timber base the vessel lies on
- PK-A / PK-B / PK-C: contractor labour only / buy ready-made skids / turnkey packer
- Packing-bay day: one day of the packing area being used. Mistri / jogali: carpenter / helper
